Technician internship

Second-year engineering student at ESTIA. Motivated and versatile, with a strong foundation in mathematics, physics, and industrial technologies. Endowed with a multidisciplinary mindset and experience in back-end development and project management. I am seeking a summer technician or engineering internship (June–August 2026, minimum 2 months) where I can contribute to innovative engineering solutions.

Education

- **Engineering Degree**
Since September 2024 **ESTIA Institute of technologies** Bidart, France
Specialization: Digital Design & Innovation (CNI – Conception Numérique et Innovation)
Erasmus+ mobility in Finland from January to May 2026
- **CPGE PCSI-PSI (Preparatory Classes for Engineering Schools)**
From September 2022 to August 2024 **Chateaubriand High School** Rennes, France
Engineering research project : Study of braking in a magnetic auto-belay device for climbing
Mastery of engineering fundamentals
- **Baccalauréat général (High School Diploma)**
From September 2021 to July 2022 **Marcel Gambier High School** Lisieux, France
Specialization in Mathematics and Physics-Chemistry
Option: Advanced Mathematics
Grade: Très Bien (Highest Honors)

Work experience

- **Multi-skilled Employee**
From June 2025 to December 2025 **McDonald's** Anglet, France
Seasonal then student employment
 - Customer reception and service
 - Order preparation according to quality and hygiene standards
 - Cash register management and workspace maintenance
 - Collaboration with the team to ensure efficiency and service flow
- **Intern - Back-end Development**
From January 2025 to March 2025 **SIG-IMAGE** Bidart, France
 - Design and development of a public lighting consumption calculation module with TypeScript language
 - Implementation of data processing algorithms to optimize energy consumption calculation
 - Collaboration with the team to ensure integration with existing systems and meet client needs
- **Game Master**
From October 2024 to June 2025 **Tempus escape** Bayonne, France
 - Design and facilitation of interactive experiences promoting immersion and teamwork
 - Logistical and technical supervision: configuration, maintenance and smooth running of games
 - Responsiveness and adaptability to adjust scenarios according to player needs and improve their experience

Skills

IT skills
Programming languages:
HTML, CSS, C, C++, Java, JavaScript, TypeScript, Python, Matlab, JSON
Software:
Matlab, OnShape, VS Code, VS Component, Office 365

- Professional and technical skills**
- Programming and back-end development
 - Technical project management
 - Problem analysis and solving
