About me

Final-year engineering student at ESTIA, specializing in Digital Design and Innovation. Motivated and versatile, with a solid foundation in mathematics, physics, and industrial technologies. Experienced in full-stack development (React/TypeScript, Node.js/Express) gained on GIS and agricultural management applications, combining a multidisciplinary approach with project management skills. Currently seeking a 6-month final-year internship starting March 2027.

Education

- **Engineering Degree** Since Sept. 2024
École Supérieure des Technologies Industrielles Avancées, Bidart (64210)
Specialization: Digital Design and Innovation (CNI)
Erasmus+ exchange in Finland, January to May 2026
Double-degree exchange at Cranfield University, October 2026
- **Preparatory classes PCSI-PSI** From Sept. 2022 to Aug. 2024
Lycée François René de Chateaubriand, Rennes
Research project: Study of magnetic braking for climbing self-belay devices
- **General Baccalaureate** From Sept. 2021 to July 2022
Lycée Marcel Gambier, Lisieux (14100)
Majors: Mathematics, Physics-Chemistry — Option: Advanced Mathematics
Distinction: High Honors (Très Bien)

Work experience

- **Full-Stack Developer Intern** From Jun. 2026 to Aug. 2026
Quest Innov, Dax
 - Full-stack development of business features (React/TypeScript, RTK Query, Node.js/Express, Sequelize) for an agricultural management application, from UI to backend logic.
 - Integration of push notifications (OneSignal) with browser permission management and multi-device synchronization.
 - Debugging in a multi-microservice environment: resolving complex issues (stale cache, API errors, Git conflicts).
- **Back-End Developer Intern** From Jan. 2025 to Mar. 2025
SIG-IMAGE, Bidart (64210)
 - Design and development of a public lighting energy consumption calculation module in TypeScript.
 - Implementation of data processing algorithms to optimize energy consumption calculations.
 - Collaboration with the team to ensure integration with existing systems and meet client needs.
- **Game Master** From Oct. 2024 to Jun. 2025
Tempus Escape, Bayonne
 - Design and facilitation of interactive experiences promoting immersion and teamwork.
 - Logistical and technical supervision: setup, maintenance, and smooth running of games.
 - Responsiveness and adaptability in adjusting scenarios based on player needs to improve their experience.

Computer skills

Programming languages:
HTML, CSS, C, SQL, Java, JavaScript, TypeScript, Python, Matlab, JSON, React

Software:
Matlab, OnShape, VSCode, VSComponent, Office 365 ...
